

Why is this group of **Club Executives** jumping for joy?

They've just received news the **CEO and Board** have partnered with **tic technologies** for all their web needs.

The **CEO** is happy, because the Board, staff and members are all happy – not to mention it's cost effective to use the internet for business processing.

The team now has robust and affordable online tools at their disposal allowing them to create and update multiple club sites, e-marketing, SMS, social media and can track and measure the site's performance – getting to know their members even better – using tic's flexible **Content Management Solution!**

So when you want modern, affordable online technology, from people who understand the club and hospitality industry make sure you contact **www.tictechnologies.com**

They're also extending the **CMS** and developing an Intranet for internal communications, Photos, Policies and Applications to be centralised.

Members can renew online, buy tickets, receive regular updates, view Annual Reports, download vouchers. Check out their member loyalty points and redeem for member renewals, tickets, vouchers, shop items – because tic technologies integrates with Membership Database systems.

Directors are happy because they now have a 'Virtual Paperless Boardroom'.

Our offer to you!

When you engage tic technologies for any online web solution and mention this advertisement, tic will automatically reward you with your choice of either:

- An additional online enhancement or
- a 10% discount off your initial spend

tic offers training and 'no ongoing support' charges.
